MANUFACTURE • WEBBING • PLASTIC HARDWARE • ASSEMBLIES

JUST GIVE US YOUR SPECIFICATIONS

ACW has the ability to meet virtually any required specification. Flexibility and willingness to create innovative products are what separates ACW from others in the marketplace. Our engineers and sales staff will work with your team to develop a cost-effective solution to your assembly requirements.

A WIDE RANGE OF ASSEMBLY SERVICES

In our modern facility, advanced automated and computerized equipment is used to perform an array of assembly capabilities that include sewing, cutting, punching and more. We continually invest in updating our technology to provide customers with the highest services in the industry.

EXCEEDING EXPECTATIONS FOR QUALITY AND DELIVERY

The reason ACW is able to deliver top quality and on-time services is because we manufacture and stock the substrates that are used in our assembly and production operations. This allows ACW to not only control the quality of the materials, but also have an immediate access to a variety of stock that includes plastic hardware and narrow woven fabrics.

Certified to ISO 9001:2015

American Cord & Webbing Co., Inc.

Exceeding your expectations. ACW manufactures and stocks most substrates for assemblies from our internal operations. This allows ACW the capability to deliver top quality assembly services at a competitive industry cost.

Situated in Woonsocket, Rhode Island, our facility is home to our **Narrow Fabric Weaving, Injected Molding and Industrial Sewing** operations.

While ACW is known as a manufacturer of narrow woven webbing and injected plastic hardware, our company takes great pride in the ability to provide **Custom Sewn Assemblies.**

A large percentage of the assembly components are sourced from our internal weaving and plastic departments. As a result, ACW is able to fully control quality and costs on modules used in our production.

ACW is an ISO 9001:2015 certified company.

Most of our products offer customers the opportunity for improved efficiency and profitability through our lean manufacturing operations.

American Cord & Webbing Co., Inc.

88 Century Drive, Woonsocket, RI 02895-6161 | (401) 762-5500 | www.acw1.com

ACW Co., Inc. does not assume responsibility for defects, damages or injuries caused by misuse, abuse, repair by others or unsuitability as to applications or load bearing strength. Notwithstanding anything to the contrary in any information or promotional materials furnished by ACW, all sales of ACW are governed exclusively by its standard terms and conditions which include disclaimers of liability.

CORD ASSEMBLIES

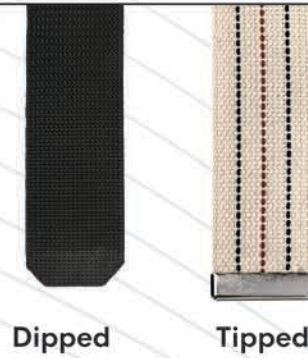

Assemblies are available in elastic and non-elastic cord.

Diameters from 1/16" to 5/16"

ENDS

Fraying ends will never be a problem for webbing or cord when utilizing tipping, seal dipping or sewn ends.

GROMMETS

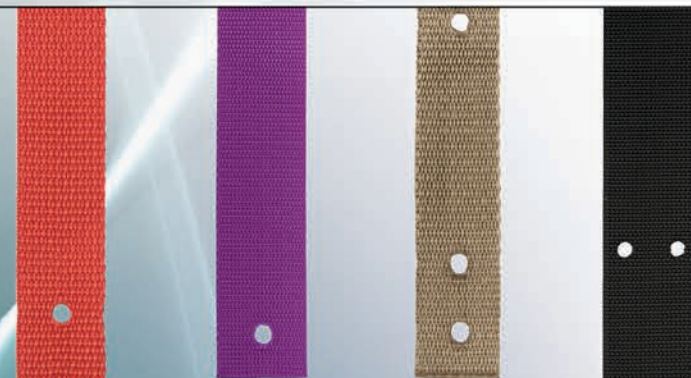

For standard applications our plain grommet and washer is the right choice. ACW offers grommets in both brass or nickel finishes. For high strength requirements, grommets offered include rolled rim and spur washers.

HOLES

ACW has the ability to match hole specifications using our automated punching and fusing (heat sealed) operations.

Hole Diameters from 1/16" to 3/8"

HOOK & LOOP & LABELS

Sonic welded or sewn. Widths for hook and loop are from 1/2" to 6".

Fully automated equipment allows ACW to sew personalized labels and create custom assemblies at competitive cost levels.

HOT & COLD CUTTING

ACW's capabilities include cold cut as well as cut and fused (heat sealed) ends on webbing and cord.

PACKAGING

Your products leave ACW ready for markets, whether it's retail or other forms of distribution and end uses.

We feature fully computerized barcoding capabilities and have the ability to work with a majority of packaging variations.

SEWING

Quality work is assured in our modern, fully computerized sewing operation.

We feature a variety of programmable patterns using heavy and lightweight threads.

SNAPS & CLASPS

Snaps are available in steel or brass with the option of nickel or black finish. Steel clasps have the option for easy or hard action release capabilities; including a nickel or brass finish.

ULTRASONIC WELDING

To accomplish an appealing appearance, ultrasonic welding is the ideal solution.

ACW utilizes the newest technology available to weld most webbings in addition to hook & loop products.

WEBBING ASSEMBLIES

ACW is the industry leading producer of top-quality webbing assemblies.

ACW will exceed your expectations through our wide variety of widths and lengths in either elastic or non-elastic webbing.

Premier Manufacturer offering Industrial Sewing Services.
